

SEO Work for the Jobpoint.com.au website

Contributed by Javier Yep Garcia
Thursday, 05 July 2007

We are currently working on the seo for the Jobpoint.com.au website, Jobs in Australia. What is this website about? - JobPoint Australia provides employers, recruiters and job seekers with high utility online resources and career enhancement opportunities. Here at Godmarketing.com we plan to bring this job website at the very top of the google search engine... Are we going to make it?, you bet!Technics used:

We have an exact process to follow, but we dont want to put just a 'how to' list, because we think this is not the only and only 'how to' document to follow, every site needs to be worked differently, and there is not a real or absolute 'step by step' to follow. Most of them are here on this website, you just need to browse it and you will find all of our seo recommendations.

Here is an overview of the work done until today:

- Template verification (css and content ordered)
- Analysing the 'link building' made until today, and preparing to make it more on this.
- Listing some of the relevant sites:
