Where the heck are the "Search Engine Optimization Technics" on this site!!!?

Don't bother searching for any list of the SEO Technics on this site. This site is for talks about what is good or what is not good in the SEO world, maybe I will talk about any specific technic, white or black, but this website is not intended to provides with a "direct", "easy to use" or "out of the box", "Search Engine Optimization Technics" list. Do you know why? - Because it doesn't really exist, I mean, as a fixed and no-questionable list. There are some basics (Title with keywords, css templates, metatags, dynamic tite per page, copywriting...), for sure, but I am not here to talk about those basic things :). Newbee or Advanced, you need to browse and read this site to start discovering the seo world. Google is changing and ruling the things frequently. So there is not a list to give you. Just browse the site, read and have your own conclusions and apply them to your site. You can contact me in any case, I am sure I can help you!

... to be continued...
