Trends shows that 80% of my visitors, are looking for the "SEO Basics" Information (Attention! "Basic" doesn't mean "Less Important"), that is good to know about people wanting to learn about search engine optimization and not only learn it, but also, to be the best and I think you can achieve this, but you need to have a good start! And the only "Good Start" step to do is reading the SEO Book - by - Aaron Wall, I have read this book long time ago, and you know what? - It is always good to have a look again, because it is so much well written, and explain many basic and very important points you need to understand and apply in your internet adventure (including the seo part of course). I highly recommend this book to anyone, it is so nice to have a good read of something very useful all the long way.

Is this book, only intended to the newbie audience? - I don't think so!, This book is good, and even seo-advanced people can take advantage of this book, since as you may already know, even the advanced people need to have a good "refresh". I simply recommend this book, you wont be disappointed.
