Today everyone is looking for these Google Ranking Services, but only few of them are finding the good provider they are looking for!. Sadly true!. Today many amateurs are proclaiming themselves as 'SEO Experts'... the loud way! but many of them are just playing with their customers. I have recently visit a company (online company) which is claiming they are a very experienced team doing SEO (Search Engine Optimization) around the world and to hundreds of customers. But my question is, How Can They Claim They Are SEO Experienced Team If They Are Not Even Listed Within The 20 First Positions In Google?!... How?!

Let's make some google searches: "blackhat technics", "Whitehat technics" , "High Rating on Google", "SEO How it works?", "SEO Best results technic", "Optimization Technics Books"...

... and look for us in the results from the google search results!

...to be continued...
